## **Xodus Medical Launches New Variations of Their Popular Lift-Free Patient Positioning Device**

Pittsburgh, PA, *February 19, 2024* – Xodus Medical is thrilled to introduce two innovative variations of their highly acclaimed lift-free patient positioning device, the Pink Pad Air-Assist. Since its initial launch in the summer of 2023, the Pink Pad Air-Assist has enjoyed remarkable success. In response to direct customer feedback and the growing demand for cutting-edge medical solutions, Xodus Medical has launched new variations to cater to diverse patient positioning needs.

### **Introducing the Pink Pad Air-Assist Trendelenburg +**

The Pink Pad Air-Assist Trendelenburg + is an advancement in lift-free patient positioning for heavy, high-BMI patients. The new design, which features an extra distal air channel, elevates lifting and transfer capabilities for seamless repositioning. It remains optimized for both lithotomy and steep Trendelenburg positioning. As a result, customers have a new, flexible solution to choose from based on their patient population and procedural needs.

### **Introducing the Pink Pad Air-Assist EXT + Trendelenburg**

The second variation, the Pink Pad Air-Assist EXT + Trendelenburg, is defined by its 72-inch length and the stability of Xodus Medical's proven Trendelenburg material. This solution addresses the unique challenges associated with patients who require both supine and Trendelenburg positioning. With revised air channels and newly configured Pink Pad strips, this solution ensures effortless patient transfer, repositioning, and stability. The resulting system offers a best-practice solution that addresses both patient and staff safety challenges.

## **Made in the USA**

Proudly manufactured in the USA, both the Pink Pad Air-Assist Trendelenburg + and the Pink Pad Air-Assist EXT + Trendelenburg are now available to purchase and ship anywhere within Xodus Medical's global distribution network.

## **About Xodus Medical**

Headquartered near Pittsburgh, PA, Xodus Medical provides patient-safety best practices for surgeons and operating room nurses. Our solutions are tailored to help patient safety advocates achieve standards set forth by the WHO, CMS, AORN, TJC and OSHA. Dedicated to the needs of our customers, we deliver innovations that help protect patients and promote positive surgical outcomes.
