

DermaProx™ Pads

A Necessity for Every Pressure Injury Prevention Program

Breathable, Adhesive-Free Skin Protection

- Meets recommendations set forth by the AORN Tool Kit for the Prevention of Perioperative Pressure Injury
- Breathable, moisture-wicking, pressure-distributing material helps prevent HAPI occurrence
- Protects skin without the use of sticky adhesives; the removal of which may cause skin tears
- Prevents CMS Never Events and complies with AORN Patient Positioning Guidelines for pressure management
- Single-use design eliminates cross contamination
