

# Surgical BackPacks™

Safer Spine and Prone Positioning Systems

A New Standard of Care that Supports  
AORN Guidelines and Recommendations

# AORN Guidelines & Recommendations

- “Apply prophylactic materials (e.g., dressings, non-adherent devices designed to reduce PI risk) to bony prominences (e.g., heels, sacrum) or other areas subjected to pressure, friction, and shear in patients identified as being at high risk for PI.”  
[Safe Patient Handling and Mobility - Section 4.1](#)
- “Placing padding between the patient and hard surfaces and using additional padding on bony prominences and other pressure points increases patient comfort, helps redistribute pressure, and decreases the potential for nerve or PI.”  
[Pressure Injury Prevention - Section 3.4](#)
- “Use additional pressure-redistributing padding to support the patient and redistribute pressure from bony prominences and other pressure points.”  
[Safe Patient Positioning - Section 3.14](#)

## Protect Your Patients Against Preventable Injuries

### New Layers of HAPI Protection

Traditional spinal table covers focus primarily on equipment protection and reducing cross-contamination risks rather than addressing skin protection and the prevention of Hospital-Acquired Pressure Injuries (HAPI).

Xodus Medical has elevated the standard for spinal table covers to achieve new levels of patient safety with the introduction of DermaProx™

### The DermaProx™ Difference

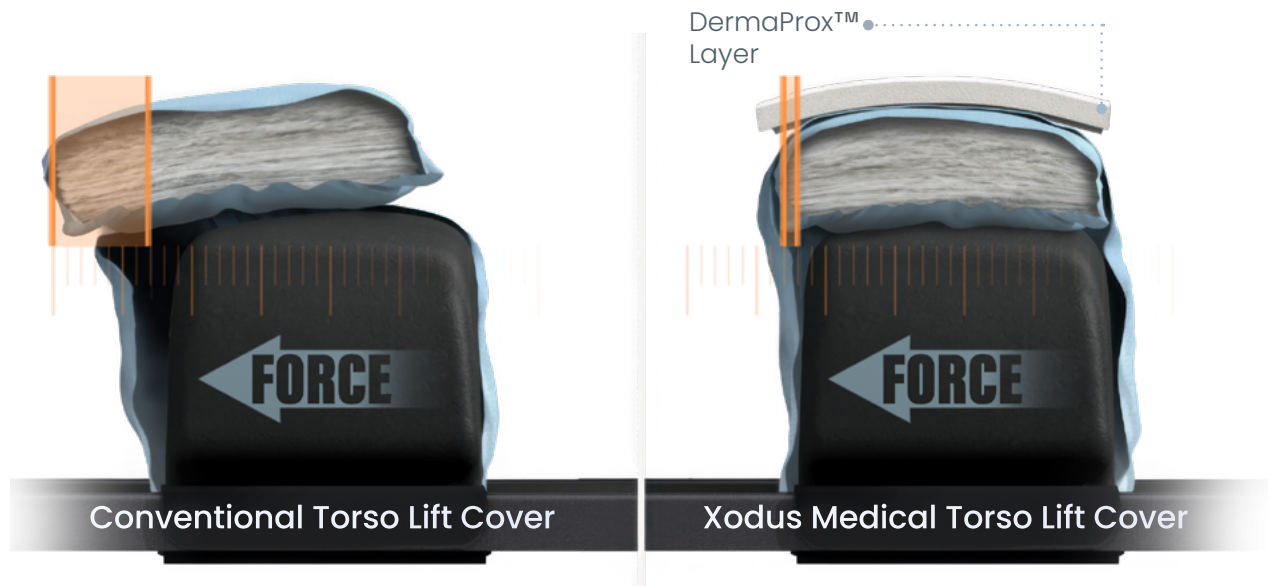

Provide optimally balanced pressure-distribution, immersion, envelopment, insulation, and moisture-management properties for your patients.

Available for a multitude of applications, DermaProx™ helps create a safe interface between patients and surgical equipment.

# Designed to Eliminate Skin Shearing

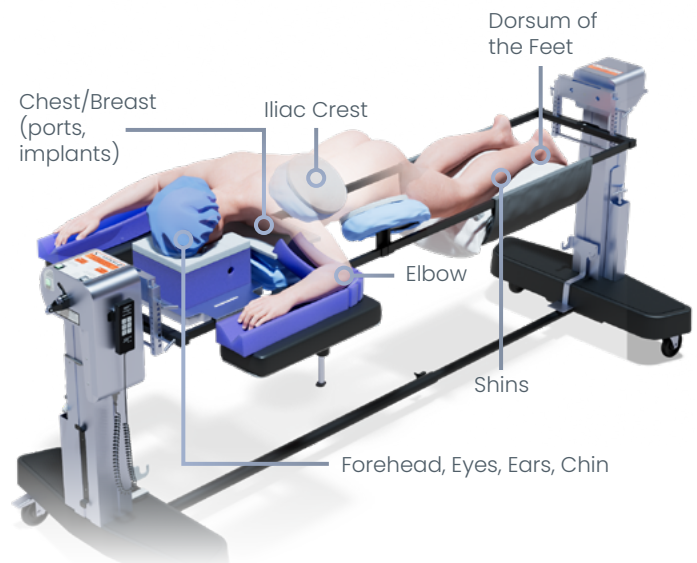

Thoughtfully Designed Solutions Offer an Ideal Fit for Your Unique Surgical Equipment; Ensuring Consistent, Repeatable Patient Protection

## Reduce the Risk of Hospital-Acquired Pressure Injuries (HAPIs)

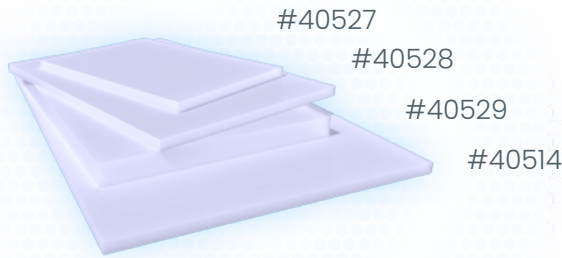

### Total-Body Protection

- Enhance pressure distribution on bony prominences and high risk patient areas
- Minimize non-reimbursable care costs; avoid preventable injuries and CMS Never-Events
- Achieve a precise fit for your specific equipment with customizable kits
- Help meet AORN guidelines and recommendations for safe patient positioning
- Protect skin without the use of sticky adhesives; the removal of which may cause skin tears

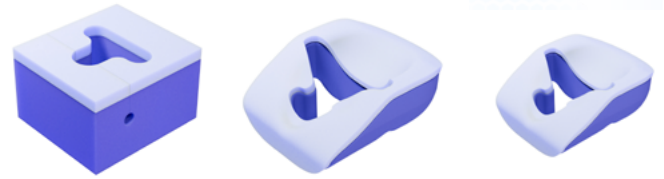

# Versatile Positioning Solutions

## DermaProx™ Pads

Product #	Dimensions
#40529	11" x 15" x 1"
#40528	11" x 15" x 0.5"
#40527	11" x 8" x 0.5"
#40514	22" x 14" x 0.5"

## Head Positioners

Product #	Dimensions
#40448	10.5" x 9.75" x 6.5"
#40599	Inner Dims 7.25"x5.0"
#40699 (Pediatric)	Inner Dims 5.75"x4.5"

# Customizable Solutions

**#SPK10113**  
Jackson Spinal Table  
Standard Kit

- 1 Single-Use Standard Laminectomy Arm Cradles Left & Right Pair
- 1 Single-Use Slotted Head Positioner w/ DermaProx Layer
- 4 Hip & Thigh Pad Covers w/ DermaProx Layer
- 1 Inverted Torso Lift Cover - Tall Pillow sewn inside cover w/ DermaProx Top

**#SPK10281**  
Jackson Spinal Table Kit w/  
ProneSafe

- 1 Single-Use Standard Laminectomy Arm Cradles Left & Right Pair
- 1 ProneSafe Head Positioner w/ DermaProx Insert
- 4 Hip & Thigh Pad Covers w/ DermaProx Layer
- 1 Inverted Torso Lift Cover - Tall Pillow sewn inside cover w/ DermaProx Top

**#SPK10172**  
Jackson T Kit

- 1 Single-Use Standard Laminectomy Arm Cradles Left & Right Pair
- 1 Single-Use Slotted Head Positioner w/ DermaProx Layer
- 4 Hip & Thigh Pad Covers (Small) w/ DermaProx Layer
- 1 Inverted Torso Lift Cover - Tall Pillow sewn inside cover w/ DermaProx Top
