

The Pink Lat Pack™

A New Standard for Safe, Effective, and Efficient Lateral Positioning

Adjustable Lateral Head Positioner

Skin-friendly materials, adjustable height, and an ergonomic design make this the ideal lateral head positioner

Breathable, Skin-friendly,
Moisture-wicking
Material

Safety Maximized

Increase patient safety with DermaProx™ and PinkProtect™ breathable, moisture-wicking materials that gently immerse and envelope areas prone to pressure injury.

Multi-Angle Wedge

35°, 55°, and 90° inclination options ensure ideal positioning for every patient and procedure

Standard of Care Emphasized

No customization required. Pink Lat Packs™, regardless of weight or BMI, provide a safe, consistent standard of care for every patient, in every procedure, every time.

Efficiency Optimized

In clinical trials, an average of 15–20 minutes were saved during setup. When necessary, The Pink Lat Pack™ makes repositioning faster, safer, and easier.

“HAPI occurrence affects 2.5 million patients per year, adding more than \$43,180 per patient on average in-hospital costs.”

Revolutionary Positioning Security

When layered, PinkProtect components create a non-permanent bond up 11X more secure than traditional positioning-material combinations, and more than double that of other foam-based combinations.

The stability of PinkProtect components used in conjunction with one another eliminates the need for tape, increases positioning security, and saves valuable OR time.

“For years prior to the introduction of Pink Lat Packs, we at Yale New Haven Hospital relied on reusable devices for patient positioning in the lateral-decubitus position.

Interrupting procedures to reposition patients could negatively impact both patient safety and surgical efficiency. Pink Lat Packs are now an important component of our efforts to safely secure our patients, protect their skin and, ultimately, improve surgical outcomes.”
