

Patient Safety **Innovations**

Material Differences

Innovative Solutions for Improving Patient Safety

PinkProtect™

PinkProtect is Xodus Medical's signature patient positioning material, designed to deliver unmatched security and protection. Developed with innovative technology, it serves as the foundation for many of our patented patient-safety solutions.

The world's leading surgical hospitals have independently selected PinkProtect™ as the #1 choice for preventing Hospital-Acquired Pressure Injuries (HAPIs) in challenging positioning scenarios.

PinkProtect™ Biodegradable

The safest, most clinically proven and preferred positioning solutions are now Biodegradable! This breakthrough technology leads the way towards a more sustainable OR environment.

Available exclusively from Xodus Medical, PinkProtect™ Biodegradable materials have been independent laboratory tested and certified to ASTM D5511 Standards for Biodegradability.

DermaProx™

DermaProx™ is a unique, skin-friendly material with optimally balanced pressure distribution, immersion, envelopment, insulation, and moisture management properties. Available for a multitude of applications, it helps create a safe interface between patients and surgical equipment.

SafeSupport™

SafeSupport™ single-use positioning foam offers industry-leading levels of support, while maintaining ideal patient safety characteristics (breathability, softness, etc.).

SafeSupport™ is safe for use in standalone patient positioners, but it makes for an excellent support/structural layer when used in conjunction with PinkProtect and/or DermaProx™.

SafeSupport HD™

Xodus Medical's most supportive, highest-density positioning material is an essential element for safe bariatric patient positioning.

In addition, it serves as an ultra-supportive core material when used in multi-layer solutions (i.e. Pink Arcs).

The Hot Pink Pad™

Next Generation Patient Temperature Management

Innovative, Active Patient Warming

New Technology for Improved Surgical Outcomes

- Safely manage normothermia
- Accurately, efficiently deliver active patient warming
- Integrate temperature management into the safest positioning solutions
- Reduce Surgical Site Infection (SSI) as well as Hospital Acquired Pressure Injury (HAPI) risks

Help Prevent Inadvertent Perioperative Hypothermia (IPH)

Actively Reduce Dangerous, Costly, and Documented Patient Risk Factors:

- Surgical site infections (SSI)
- Impaired drug metabolism
- Blood loss
- Increased pain

IPH is a CMS measure for reimbursement and associated with impaired surgical recovery, extended postanesthesia care unit (PACU) times^{2,1}, increased risk for admission to the ICU, and longer hospital stays^{2,2}

Reportedly the most common surgical complication, IPH has an incidence rate greater than 40%^{2,3} While incidence rates vary by surgical specialty: a recent study found that 72% of orthopedic surgery patients were hypothermic.^{2,4}

The Foundation of an Effective Normothermia Bundle

The Hot Pink Pad Enables Clinically-Proven, Active Underbody Patient Warming^{2,5}

- Improved core temperature control^{2,6}
- Easier to warm the body's central region^{2,6}
- Potential for less surgical site disruption
- More effective in underbody warming applications relative to traditional, forced-air solutions^{2,7, 2,8}
- Effectively functions while supporting safe patient-positioning techniques
- Improved ease of use

Active Warming Throughout the Perioperative Process

Provide Your Patients Immediate, Consistent Temperature Management

1

Core temperature can fall 0.5°–1.5° below normal within just 30 minutes of general anesthesia induction^{2,9}

30 mins
Pre-op

2

Patients' core temperatures decline most dramatically during the first hour of surgery^{2,9}

One Hour
Surgery Time

3

"Implement (active warming methods)...for all patients during all phases of perioperative care (ie, preoperative prewarming, intraoperative, postoperative)"

—AORN

30 mins
Pre-op

Smarter Technology for Maintaining Normothermia

Carbon-Based Warming

Ideally suited for the OR, IntelliTherm™ warming elements are thin, flexible, radiolucent, and IPX rated (fluid resistant)—providing perioperative environments with safer conductive technology

Intelligent Normothermia Software

Intelligent normothermia software continuously monitors and adjusts warming output, helping keep patients safely within target temperature ranges without added staff burden

Precise Temperature Control

Easy to adjust temperature settings range from 36°C - 40°C in half-degree increments, while constant, digital temperature monitoring occurs in multiple locations beneath the patient

"Truly seamless! The Hot Pink Pad integrated instantly into our practice. It maintains normothermia and helps reduce SSIs without forced-air or added interventions. Plus, I know my patients are otherwise very well protected—a complete home-run solution."

— Dr. Karleigh R. Curfman, MD
Colon & Rectal Surgery

"I was very impressed with the stability of our patient's temperature throughout a complex robotic procedure. The Hot Pink Pad provided more effective warming and a more streamlined, less disruptive delivery method. That's a clinical win-win!"

— Jason Lehman, CRNA

A New Focus on Key CMS Quality Measures

The Hot Pink Pad Helps Improve Key Patient Safety Indicators

Pressure Injuries

HAPIs are the second most common hospital lawsuit claim after wrongful death, impacting 60,000 patients each year.

CMS has estimated that a pressure injury adds more than \$43,000 in costs to a single hospital stay.¹⁰

Hemorrhage / Hematoma

Each year in the US, more than 14,000 patients suffer from blood clots or internal bleeding caused by blood vessels injured during surgery.¹¹

Uncontrolled intraoperative bleeding can cost hospitals up to \$61,000 per patient.¹²

Surgical Site Infections

SSI is the most costly Hospital Acquired Infection (HAI) type, where total incremental Length of Stay (LOS) increases by 9.7 days.

The added cost of hospitalization can exceed \$20,000 per admission.¹³

Patient Temperature Management that Meets AORN Guidelines and Recommendations

AORN Recommends:

- "Implement (active warming methods) to prevent and treat inadvertent perioperative hypothermia... for all patients during all phases of perioperative care (ie, preoperative prewarming, intraoperative, postoperative)" [[Recommendation, Section 3.2](#)]
- "...Researchers concluded that active body surface warming was demonstrated to be effective in maintaining normothermia, decreasing the incidence of SSI, decreasing shivering, decreasing blood transfusions, and increasing patient satisfaction..." [[AORN Guidelines: Patient Temperature Management, Section 3.2](#)]

#40671 – Hot Pink Pad XL Kit

#40673 – Hot Pink Pad EXT Kit

*Not all components are pictured

Enhanced Intraoperative Laparoscope Cleaning & Defogging

NEW

Easy, Universal Trocar Attachment

- Faster cleaning exchanges
- Reduced SSI and equipment-damage risks
- Increased control and improved management of intraoperative visualization

Better Visualization

More effective cleaning and defogging for improved, longer lasting visibility

Before

After

Complete Control

- Consistent, reliable performance, even in surgeries lasting up to five hours
- An on/off switch to wait out delayed cases, eliminating the need to open multiple units per procedure
- Innovative, internal seals to prevent fluid leakage

Perfect Temperature

Safe for use with modern, robotic laparoscopes. Thermostatically-maintained temperatures:

- Extend battery life
- Improve performance
- Protect sensitive surgical equipment

The Total Package

- Everything included
- Unique Trocar Swabs are tailored to your trocars, and reduce retained instrument risk

The Pink Pad[®]

The Safest, Most Clinically Proven & Preferred Trendelenburg Positioning Solution

TRENDELENBURG

- **Prevent Patient Sliding**

The Pink Pad is the safest, most effective solution for reducing unwanted movement in steep Trendelenburg; even for heavy, high-BMI patients

- **Reduce Risk of Hospital-Acquired Pressure Injuries (HAPIs)**

The Pink Pad's unique, open-cell material is breathable, moisture wicking, insulative, soft-to-the-touch, immersive, and enveloping. **Independent studies prove that the Pink Pad reduces erythema** compared to other positioning solutions.

- **Eliminate Brachial Plexus Injury**

The Pink Pad is clinically proven to reduce post-operative pain in surgical patients. It functions without placing pressure on the head, neck, or shoulders; thereby eliminating the risk of preventable nerve injuries.

U.S. Patents:
8,464,720;
8,511,314; 9,161,876;
9,750,656; 9,782,287;
9,931,262; 9,949,883;
10,045,902; 10,285,890;
10,324,050; 11,484,456;
Canada Patent:
2,859,398
Japan Patent:
JP6863841B2

Additional Patents Pending

“Patients on the Pink Pad had significantly less displacement with Trendelenburg and faster positioning compared to the other surfaces.”¹

¹ Journal of Minimally Invasive Gynecology 27, S1-S82

Prevent Sliding

Reduce HAPI Risk

Avoid Nerve Injury

Proven Pressure Management

In a study of 15 subjects (BMI range: 16–54; mean BMI: 35.5), the Pink Pad achieved an average peak pressure reduction of 43%.

The cost of treating Hospital Acquired Pressure Injuries (HAPIs) is over \$1 billion annually, with average increased hospital stays at nine days, and non-reimbursed treatment costs potentially exceeding \$40,000 per patient.

“...There was significantly less pain in the Pink Pad group... [it] presents a novel opportunity to limit the narcotic requirement after minimally invasive gynecologic surgery.”²

² Journal of Minimally Invasive Gynecology 27, S1-S82

Proven Solutions that Help Patient Safety Advocates Meet AORN Guidelines & Recommendations

Official AORN Guidelines Cite Research:

- Demonstrating the use of the Pink Pad resulted in “significantly less [patient] movement at all anatomical landmarks.” *Section 5.6 – Positioning the Patient*
- That establishes obesity as a “major predictor of movement” in Trendelenburg positions, where “researchers concluded that patients on the Pink Pad had significantly less displacement.” *Section 5.6 – Positioning the Patient*

Additionally, AORN Guidelines State:

- “Do not use shoulder braces.” *Section 5.7 – Positioning the Patient*
- “A standardized product selection process assists in the selection of functional and reliable products that are safe, cost-effective, and environmentally preferable and that promote quality care, as well as decreases duplication or rapid obsolescence.” *Section 1.1 – Environmental Cleaning*

The Pink Pad[®] Biodegradable

The Safest, Most Clinically Proven and Preferred Trendelenburg Positioning Solution, Now Biodegradable!

Independent Laboratory Tested & Certified to ASTM D5511 Standards for Biodegradability

“Our hospital system is working together to achieve ambitious environmental goals. I have been searching for a solution that would help our department contribute to this broader effort. We found something tremendously helpful with the Pink Pad Biodegradable. It gives us everything from a patient-safety standpoint, and now delivers a significant “green” advantage. Win-win!”

BreAnn Brong - OR Manager
Tacoma, Washington

ASTM D5511

Introducing The Pink Pad Biodegradable

- The only product of its kind to meet ASTM Standards for Biodegradability
- The most innovative, patented, clinically-preferred solution for increasing patient safety in the Trendelenburg position
- Safer for patients; safer for the environment!

The Pink Pad EXT™

Full-Length Protection for Supine Trendelenburg Positioning

New
Product

New Biodegradable Option 🌱 #40678

- (1) Biodegradable Pink Pad EXT
- (1) PinkProtect™ Head Positioner with Biodegradable Top & Bottom Layers
- (2) Single-Use One-Step™ Arm Protectors with DermaProx™ Layer
- (1) Lift Sheet
- (2) Single-Use Body Straps

TRENDELENBURG

“We find the Pink Pad to be the best and most versatile solution for Trendelenburg positioning, and we have tested/trialed many other products. At this point, it is the only available product that does not compromise patient care and the safest to date.

We recently evaluated the Biodegradable version which is yet another example of the Pink Pad leading the market in terms of quality, performance, and safety.”³

³ K. Shawn LyBarger, DO, MS(R), Gynecologic Oncology

Multiple Positioning Systems Feature the Biodegradable **Pink Pad**®

TRENDELENBURG

Our Most Popular Solution:

#40695 – Biodegradable Pink Pad XL – Trendelenburg Positioning Kit

- (1) Biodegradable Pink Pad® XL
- (1) Skin-Friendly Body Strap (pair)
- (1) PinkProtect™ Head Positioner with Biodegradable Top & Bottom Layers
- (1) Lift Sheet
- (2) Single-Use, One-Step™ Arm Protectors with DermaProx™

Reduced Carbon Footprint

In addition to achieving lab-certified biodegradability, Xodus Medical is focused on reducing manufacturing and supply-related carbon emissions.

The Pink Pad is proudly Made in the USA, and distributed via an increasingly sustainable supply network. These efforts help us achieve unique, but associated goals that include maximizing product quality, a more carbon-neutral manufacturing future, and making surgery safer.

The Pink Pad® AIR ASSIST™

Safer, Easier Patient Transfer and Trendelenburg Positioning

New
Product

TRENDELENBURG

U.S. Patents: 12,678,360;
Additional Patents Pending

Lift-Free Transfer and Repositioning for Patients of all Sizes

- Integrating the Biodegradable Pink Pad® into both top and bottom surfaces of an air-assisted transfer system ensures skin protection, as well as patient stability in Trendelenburg and reverse Trendelenburg
- Safely position high-BMI patients while protecting against Hospital-Acquired Pressure Injuries (HAPIs) and nerve damage

Proven Solutions that Help Patient Safety Advocates Meet AORN Guidelines & Recommendations

- "Moving patients can also contribute to injury. When moving patients, use assistive technologies to help prevent staff injuries and keep patients safe. These might include air-assisted transfer devices..." [AORN 9/2023](#)
- "Select patient lift equipment that minimizes the physical forces required to move the patient. [Recommendation]" [Section 4.3.1](#)

Canada Patents: 2,859,398

Additional Patents Pending

#40640

- **Safely Prevent Sliding**

An innovative seat contour made of high-density, supportive material ensures anatomically correct positioning, while skin-friendly PinkProtect™ safely prevents unwanted movement in reverse Trendelenburg

- **Reduce Risk of HAPIs**

Unique, patented materials provide complete protection against HAPIs; minimizing non-reimbursable care costs by avoiding preventable injuries and CMS Never-Events

- **Improve Perioperative Workflow**

The Pink Reverse-T Kit™ requires less than one minute to set up. A single-use design minimizes cross-contamination risk and improves OR turnover times.

// "With patients weighing 450lbs or more, and BMIs in excess of 65, safe positioning can be a real challenge. Xodus Medical's Pink Reverse-T Kit not only prevented our patients from sliding, but did so safely."

— Alicia C, RN, BSN,
Surgical Services Manager, Hartford, KY

Positioner Options Available**

More options available at
xodusmedical.com

“If you already use Xodus Medical Pink Pad Products in the OR, then you know how amazingly breathable the proprietary, open-cell material is. It prevents shear and wicks away moisture, preventing irritation and breakdown.”

— Susie Hammant, RN, CNOR Metairie, LA

The Pink Lat Pack™

A New Standard for Safe, Effective, and Efficient Lateral Positioning

LATERAL DECUBITUS

Adjustable Lateral Head Positioner

Skin-friendly materials, adjustable height, and an ergonomic design make this the ideal lateral head positioner

Multi-Angle Wedge

35°, 55°, and 90° inclination options ensure ideal positioning for every patient and procedure

Breathable, Skin-friendly, Moisture-wicking Material

Safety Maximized

Increase patient safety with DermaProx™ and PinkProtect™ breathable, moisture-wicking materials that gently immerse and envelope areas prone to pressure injury

Standard of Care Emphasized

No customization required. Pink Lat Packs™, regardless of weight or BMI, provide a safe, consistent standard of care for every patient, in every procedure, every time.

Efficiency Optimized

In clinical trials, an average of 15–20 minutes were saved during setup. When necessary, The Pink Lat Pack™ makes repositioning faster, safer, and easier.

“HAPI occurrence affects 2.5 million patients per year, adding more than \$43,180 per patient on average in-hospital costs.”

— Agency for Healthcare Research & Quality

“For years prior to the introduction of Pink Lat Packs, we at Yale New Haven Hospital relied on reusable devices for patient positioning in the lateral-decubitus position.

Interrupting procedures to reposition patients could negatively impact both patient safety and surgical efficiency. Pink Lat Packs are now an important component of our efforts to safely secure our patients, protect their skin and, ultimately, improve surgical outcomes.”

— Wilma Flores, BSN, RN, CNOR
Perioperative RN Specialty Coordinator, Transplant & Vascular Service
Yale New Haven Hospital

The Pink Hip Kit™

Postless Positioning System

Eliminate Post
Related Injury

HIP PROCEDURES

xodusmedical.com/pinkhipkit

- **Safer Surgery**

Go Postless! The Pink Hip Kit safely provides the counter-traction required to offset the force of hip distraction—securing the patient without leveraging the perineum against a rigid post.

- **Reduced Risk of Hospital-Acquired Pressure Injuries (HAPIs)**

The Pink Hip Kit features a breathable, moisture-wicking, soft, enveloping, immersive, and pressure-distributing material that interfaces with sensitive patient areas. This unique material provides an ideal balance of skin-protection properties that reduce the risk of HAPIs.

- **Streamlined Procedures**

A postless approach requires shorter traction time, eases hip distraction, improves C-Arm visualization, and provides a greater range-of-motion for more complete dynamic exams—all without changes to your surgical technique.

#SPK10186

ProneSafe™

Maximize Patient Safety in Prone Positioning #40599

PRONE & SPINAL

Patient Safety Advantages

- Improve HAPI protection with DermaProx™; a unique material that balances softness, breathability, immersion, envelopment, and moisture-wicking characteristics to create the ideal interface between patients and surgical equipment
- Enhance pressure distribution on bony prominences and high risk patient areas
- Minimize non-reimbursable care costs; avoid preventable injuries and CMS Never-Events
- Achieve a precise fit for your specific equipment with customizable kits

Proven Solutions that Help Patient Safety Advocates Meet

AORN Guidelines & Recommendations

- "Placing padding between the patient and hard surfaces and using additional padding on bony prominences and other pressure points increases patient comfort, helps redistribute pressure, and decreases the potential for nerve or PI." *Section 3.4 - Pressure Injury Prevention*
- "Patients who undergo procedures in the prone position are vulnerable to pressure injury on the face, breasts, lower costal margins, iliac crests, genitalia, knees, and toes." *Section 7.1 - Prone Positioning*

Freeman Arm Positioner

An Innovative Solution for Safe, Efficient Arm Positioning

New
Product

SHOULDER

*Optional components shown

“This new solution streamlines patient positioning and elevates our standard-of-care; both in terms of efficiency and, most importantly, patient safety.”

Carl R. Freeman M.D., Orthopedic Surgeon

Patient Safety Advantages

- A novel solution that safely positions the surgical-side arm away from the operative site
- Incorporates a skin-friendly body strap that secures patients to the OR table, as well as helps stabilize the arm-positioner component
- Includes a secondary, skin-friendly positioning strap for added security and easy, accessible adjustment of the affected arm

Product

Safer Skin Protection and Spinal Alignment for Surgical Patients

PRONE

Patient Safety Advantages

- Various height settings adapt to the individual needs of your patients
- Multiple layers enhance patient safety
 - » Skin-friendly DermaProx™ top layer protects against Hospital-Acquired Pressure Injuries (HAPIs)
 - » Materials optimized for both skin protection and long-term support
- Open-cell material helps manage moisture; protect patients' skin

Camel Mats™ | Absorbent Floor Protection

Solutions for Maintaining Clean, Dry Hospital Floors

Help Eliminate Slips, Trips, and Falls

- Keep hospital floors clean and dry
- Single-use design improves infection control and reduces cross-contamination
- Non-slip backing for secure placement

Advanced Fluid Retention Technology

Fluid-absorbing polymer traps liquid for easy and convenient cleanup and enhances absorption, preventing fluid drips

Camel Cord Cover™

Two peel strips reveal residue-free adhesive that secures the cover to the floor. This feature safely secures cords and decreases the risk of trips and falls.

Available in two sizes

Camel Mat – Standard Absorbent

Prod #	Size
#80510	24" x 32"
#80520	32" x 40"
#80527	32" x 56"

Camel Mat – *Ultra* Absorbent

Prod #	Size
#80512	24" x 32"
#80522	32" x 40"
#80526	32" x 56"
#80524	48" x 80"
#80525	*48" x 80"

*w/ cutout

Camel Mat – *Max* Absorbent

Prod #	Size
#80532	24" x 32"
#80531	32" x 40"
#80530	32" x 56"

Soft Step™ Floor Protection Solutions

Increasing Safety and Comfort for Hospital Staff

- Tapered channels prevent problematic puddles in the OR
- Decrease muscle fatigue
- Increase safety and help prevent workplace injury
- Available in extra-long and mini sizes

ANTI-FATIGUE MATS

Product #	Size
#80543	70" x 20"
#80544	35" x 20"
#80545	17" x 13"

#80545

#80541

"Prolonged standing during surgical procedures poses a high risk of causing musculoskeletal disorders, including back, leg, and foot pain, which can be chronic or acute in nature."

— AORN Journal. June, 2011

#80537

Fitted Camel Mat

Extend the usable life of Soft Step mats by incorporating single-use, absorbent covers

Available in two sizes:

- #80536 - 39" x 24"
- #80537 - 74" x 24"

Laparoscopic Electrodes

- PTFE coating reduces eschar buildup and easily wipes clean with a sterile sponge, saving valuable OR time
- Insulation is both high-heat and chemical resistant
- Fully-insulated shafts are individually tested, reducing the risk of stray current or unwanted burns

Pencils & Tips for Open Procedures

- Superior non-stick coating reduces eschar buildup
- Easy to clean with only a damp sponge, saving valuable OR time
- Performance is exceptional at lower power settings, helping to minimize thermal necrosis risk
- Greater precision throughout procedures
- Available with PTFE coated, tungsten, or stainless steel tip styles
- Visit xodusmedical.com for an array of options

Rocker Pencil with Electrode

2.5 cm Tungsten Micro-Needle **#20072**

3 cm Tungsten Micro-Needle **#20070**

Operating Room Essentials

#80710

Magnetic Transfer Drapes

CE 0459

- Keep instruments within reach
- Facilitate hands-free transfers

Medication Labels

- Prevent medication errors
- Water-proof, synthetic, non-smearing, customizable

Surgical Site Markers

- Dual-Tip
- Regular/Fine Tip
- Correct Site
- CHG Resistant Ink

CE 0459

GreenGuard Tray Protectors

#40478

#40479

- Steam and Sterrad compatible, works equally well on square or round-corner trays
- Greater airflow: decreases drying time and eliminates moisture retention

Room Turnover Kits

- Reduces risk of cross-contamination and frequency of SSIs
- Increases efficiency by reducing set up/clean up time

Needle Counters

CE 0459

- Increase sharps safety
- Many styles available

#NS30835

Emesis Bags

- Eliminates exposure to emesis
- Increases infection control
- Biodegradable

Corner Protectors

- Eliminate unnecessary costs associated with contaminated surgical trays, double-wrapping, etc.
