

Safer Pediatric Positioning

Unique Positioning Solutions Designed to Improve Safety and Surgical Outcomes for Pediatric Patients

Reduce the Risk of Hospital Acquired Pressure Injuries (HAPIs)

Unique Positioners Matched to the Specific Safety Requirements of Your Patients. Single-Use Designs Feature Ultra-Supportive Cores and PinkProtect™ Outer Layers.

- Unique, open-cell materials are breathable, moisture wicking, insulative, soft-to-the-touch, immersive, and enveloping
- Independent studies prove that the Pink Pad reduces erythema relative to other patient positioning solutions¹

1: Journal of Minimally Invasive Gynecology 27

Designed to Improve Patient Safety

PinkProtect™ is Xodus Medical's signature patient positioning material, designed to deliver unmatched security and protection. Developed with innovative technology, it serves as the foundation for many of our patented patient-safety solutions.

DermaProx™ is a unique, skin-friendly material with optimally balanced pressure distribution, immersion, envelopment, insulation, and moisture management properties

SafeSupport™ single-use positioning foam offers industry-leading levels of support, while maintaining ideal patient safety characteristics (breathability, softness, etc.)

Safer Pediatric Positioning

Unique Solutions for Smaller Patients
