

The Pink Hip Kit™

Postless Positioning System

#72205289

Eliminate Post Related
Injury

#72205682

■ Safer Surgery

Go Postless! The Pink Hip Kit safely provides the counter-traction required to offset the force of hip distraction—securing the patient without leveraging the perineum against a rigid post.

■ Reduced Risk of Hospital Acquired Pressure Injuries (HAPIs)

The Pink Hip Kit features a breathable, moisture-wicking, soft, enveloping, immersive, and pressure-distributing material that interfaces with sensitive patient areas. This unique material provides an ideal balance of skin-protection properties that reduce the risk of HAPIs.

■ Streamlined Procedures

A postless approach requires shorter traction time, eases hip distraction, improves C-Arm visualization and provides a greater range-of-motion for more complete dynamic exams—all without changes to your surgical technique.

REPEATABLE
BEST
PRACTICE

Eliminate the need for custom, off-label positioning solutions

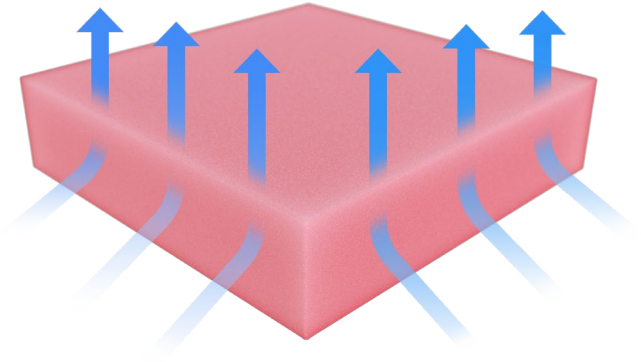

Setup time: less than one minute

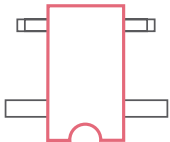

Reduce cost and eliminate cross-contamination risks

The Material Difference

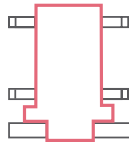

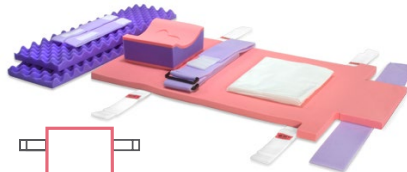

Patients are immersed and enveloped in a unique, patented material that both prevents HAPI formation and patient sliding.

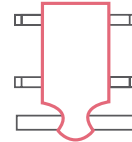

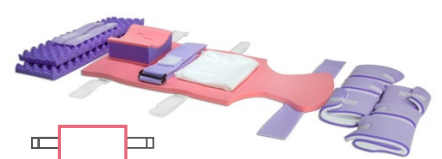

Multiple Configurations Available:
